TurboFTP 32-bit fully supports Windows 7 32-bit and Windows 2008 Server 32-bit. TurboFTP 32-bit (including the main GUI program and Sync Service module) works on Windows 7 64-bit and Windows 2008 64-bit, except that the Explorer integration is not supported (i.e. calling Upload Wizard with Explorer context menu, downloading remote files by dragging them to Explorer.)

TurboFTP 64-bit fully supports Windows 7 64-bit and Windows 2008 Server 64-bit.
